

IP PhonePlus

CREATE A "COMPANY WITHOUT WALLS"

By using the Internet as part of your communications infrastructure, your phone system is everywhere you want it to be. With the Eclipse IP PhonePlus, your data network connects your telecommuters, satellite offices, and warehouse facilities together seamlessly as if they were in the same building. It eliminates the need for a separate phone system in each location.

Because the IP PhonePlus is fully integrated with the Eclipse PBX phone system, users anywhere have access to the full functionality of the Eclipse system such as transferring calls, initiating conference calls and accessing voice mail. Call center agents working off-site can be part of hunt groups or call routing patterns and supervisors can monitor their calls as if they were in the office.

The IP PhonePlus connects you to the full power of the Eclipse system through your company's data network (LAN, WAN, or Internet connection) to send and receive voice transmissions in the form of data. It operates and looks like the Eclipse Professional Display Phone you use in the main office.

IN OTHER WORDS...

By providing remote or home workers with an IP PhonePlus and a high-speed internet connection, you can create a "company without walls." All of your workers, no matter where they are, can work as if they were physically in one location.

Eclipse²

by Inter-Tel

IP PhonePlus

FEATURES

- 6-line X 16-character alphanumeric LCD with "soft" key prompting
- LCD integration with Eclipse Voice Processing Unit
- 8 "soft" menu-driven keys
- 29 programmable keys
- 12-key "hot" push button dial pad
- Integrated 2-port Ethernet Hub
- On-screen programming of IP network settings
- Speakerphone
- Green/red LED functionality
- Speaker volume control—8 levels
- Ringer volume control—8 levels
- Handset volume control—8 levels
- User-programmable ring tone—9 tones plus Off
- Hands-free answerback on intercom

BENEFITS

- You're "in your office" for all calls, no matter where you actually are
- The LCD provides the information and prompts you need to operate productively and efficiently
- Answer intercom calls hands-free; on-hook dialing; monitor calls; listen to background music
- Customize phones with features important to you; one-button access to those features
- Reduces keystrokes required to perform a function
- Exceptional voice and audio quality, even in hands-free mode
- Answer outside calls hands-free

LESS FREQUENT TELECOMMUTING NEEDS?

Inter-Tel also offers the IP Single Line Adapter for those who work from home less frequently. Connect the IP Single Line Adapter to a high-speed internet connection (such as a DSL or cable modem), then plug any standard home phone into the Adapter's jack and telecommuters have the same basic functionality (minus the display features) offered by the IP Phone at a lower cost.

Eclipse is classified as a Hybrid Key or PBX system (FCC registration BE2USA-24359-PF-E and others).
